

**Amendments to the Specification:**

Please replace the paragraph beginning on page 6, line 21 with the following rewritten paragraph:

The present invention is concerned with recording digital images and meta-data onto a medium to produce a durable record of both the medium and the meta-data. It will be appreciated that a number of different processes can be used to record digital images and meta-data on the medium. The medium can take a number of different forms well known in the art such as being in a sheet format, or actually being part of the display. Typically, the medium has a plurality of layers (preferably five) with at least one layer that has an oriented polymer. In the following preferred embodiment, an extended color gamut digital image is recorded on the medium. It will be appreciated that the medium has a limited color gamut.
